

### **Attending the practice**

Although covid restrictions are being lifted, we ask that masks/face coverings continue to be worn while you are in the practice, unless you are medically exempt.

We continue to carry out pre appointment covid screening checks the day before your appointment with us, you will also be asked again when you report to reception for your appointment.

Hand sanitising gel is available for your use throughout the practice.

We kindly ask that if you feel unwell or currently have any cold sores, you telephone the surgery to rearrange your appointment for a different day. This is to protect our staff and other patients/visitors to the practice.

Infection control has always been a top priority for our practice and you may have seen this during your visits to our surgery. Our practice follows infection control guidelines set out by our governing bodies. We keep up-to-date on any new guidance that is issued. We do this to ensure that our infection control procedures are current and adhere to recommendations.

We no longer offer magazines, childrens toys etc, since those items are difficult to clean and disinfect.

Should you require any further information or guidance please call the practice.
